- The IDC uses the IFRS reporting framework.
- The IDC is subject to the Public Finance Management Act (PFMA) and the IDC Act.
- The IDC is not exempt from Income Tax.
- The IDC is self-funded and raises funding in the debt capital markets, through lines of credit and money market funds.
- Basel requires that there be a reasonable link between a bank's risk assessment and its pricing methodologies. The application of an internal rating based approach is an essential part of the credit risk management process and of the pricing of credit and has become the norm in the banking industry.
- The IDC has recently, with the assistance of external consultants, developed and implemented new risk rating and pricing methodologies and models for all types of investments/funding products. These models calculates expected losses over the lifetime of facilities/investments, whilst creating a database of underlying probability of default (PD) and loss given default (LGD) data. Expected losses are calculated on Basel principles.
- The IDC uses SAP as its data platform.

3. Problem statement

- IFRS 9 is an International Financial Reporting Standard (IFRS) promulgated by the International Accounting Standards Board (IASB). - Conduct an impact analysis comparing impairments under IFRS 9 and impairments under the current impairment policy/methodology i.e. the calculation of indicative impairments for the financial year ending 31 March 2017 based on IFRS 9 principles.
- Identify the information requirements for an IFRS 9 compliant system.
- Review and update the Valuation and Impairment Policy for the IDC, in line with IFRS 9.
- Development of Impairment Calculation Models/Tools for the IDC and enhancement of existing models/systems/tools, in line with IFRS 9.
- Provide support post implementation of IFRS 9 and the above mentioned impairment models/tools, for a maximum period of 3 years.

4.2 Deliverables

- A fully documented IFRS 9 compliant Valuation and Impairment Policy for the IDC;
- Systems and procedures (including flowcharts) outlining the IFRS 9 methodology;
- A user-friendly, Excel based loan impairment calculation model/tool. The tool must ideally have a single data input sheet that may be updated to calculate impairments under IFRS 9.

The appointed service provider(s) will be required to start immediately after signing the contract and provide the services till completion of the project. Post implementation support will be required for a maximum period of 3 years post implementation of IFRS 9 and the related impairment tools/models.

The project will be executed in phases with specific deliverable/completion dates:
