14. Promotion of Emerging Black owned Service Providers

It is the IDC’s objective to promote transformation across all industries and/ or sectors of the South African economy and as such, bidders are encouraged to partner with a black owned entity (being 50%+1 black owned and controlled). Such partnership may include the formation of a Joint Venture and/ or subcontracting agreement etc., where a portion of the work under this tender would be undertaken by black owned entities. To give effect to this requirement, bidders are required to submit a partnership / subcontracting proposal detailing the portion of work to be outsourced, level of involvement of the black owned partner and where relevant, submit a consolidated B-BBEE scorecard in-line with the provisions of the PPPFA Regulations which will be considered as part of the B-BBEE scoring listed in 13.3.

SECTION 3: FUNCTIONAL REQUIREMENTS SPECIFICATION

1. Special instructions to bidders

All documents as indicated must be supplied as part of the bid response.

1.3 Failure to comply with Mandatory Requirements may lead to the bidder being disqualified.

2. Purpose

The IDC administers the Industrial Policy Support Fund (IPSF) on behalf of the Department of Trade and Industry ("the dti"). This tender is therefore facilitated by the IDC on behalf of the dti.

The Electro Technical Industries sector desk within the Department of Trade and Industry (the dti) seeks the services of independent consultants with extensive and proven experience and knowledge of (a) the South African White Goods industry and its participants, (b) the refrigeration and cooking equipment products and (c) strong research expertise and experience to implement the identification, assessment and conduct a technical audit of component manufacturers of the White Goods Supplier Development.

The service provider will be required to work closely with the South African White Goods Manufacturers Forum, the South African Domestic Appliances Association, the dti and the South African Electro Technical Export Council.

3. Background Information

The dti developed a sector strategy, also known as the Customised Sector Programme, for the Electro technical Sector in 2008, which was reviewed in 2016. Through this process a number of industry sub-sectors were reviewed, thus highlighting those that exhibited potential for growth with the necessary support from government and industry. The White Goods industry demonstrated potential for growth and has proven to be resilient through the recession triggered by the global financial crisis of 2009.

In the financial year 2014/15, the Electro Technical sector desk within the Industrial Development Division of the dti developed a White Goods Export Strategy with the aim of assisting the White Goods industry to exponentially increase exports through unlocking new export markets in the Sub-Saharan Africa and the world. One of the recommendations which came out of the strategy was the establishment of the White Goods Manufacturers Forum in collaboration with the South African Electro technical Export Council.

In 2015, the White Goods Manufacturers Forum was launched. It consists of the dti, the South African Electro Technical Export Council, the South African Domestic Appliances Association and the Large Original Equipment Manufacturers in the White Goods sector.
The Forum agreed that in order to expedite transformation while achieving the necessary economies of scale for manufacturers, an import substitution programme aimed at empowering domestic component manufacturers was necessary. The Forum commissioned work to ascertain the potential to create a sustainable enterprise and supplier base in South Africa for the White Goods manufacturing sector. The scope was limited to refrigeration and cooking products.

Preliminary discussions with industry indicate that component manufacturers that could be identified include those who could supply metal sheet for the back of the fridge and the side of the door, capillaries, fridge sensor lights in the inside of the fridge, power cables for both fridges and stoves, brackets, coils, door plastic handles, evaporators, condensers, glass panels, temperature controllers, magnetic gaskets and copper for gas amongst others.

The White Goods Manufacturers forum adopted a plan to develop a White Goods Supplier Development Programme, mainly to promote economic growth by building black owned Small, Medium and Micro-sized Enterprises (SMMEs) to be actively involved in the manufacturing supply chains of the White Goods.

4. Problem Statement

In South Africa, the White Goods industry is largely dependent on imported input components. This is due to, amongst others, inadequate economies of scale, lack of locally owned intellectual property and, at times, uncompetitive pricing when looking at global suppliers of similar products. This is prevalent in electronic products such as household appliances, tablets, laptops, smartphones, vehicle tracking systems and radar systems to mention but a few.

Furthermore, there is also a phenomenon of contract manufacturing, which speaks to the dependence on OEM contracts to sustain local companies without them developing their own or using the gained expertise to develop South African made and branded electronic products.

The available expertise needs to be further developed such that the component manufacturers are sustainable, including creating stronger ties with existing White Goods OEMs and to explore other means to attract more of the OEMs.

The capabilities and capacity of local companies to produce such products is definitely not in question.

In summary, this country needs a solid White Goods component manufacturing base which can also be used as a key competence to develop a unique value proposition to further position this country as one of the strategic destinations for White Goods component manufacturing, considering the massive competition for investment against peer investment destinations like Nigeria and Kenya.

South Africa also needs to take advantage of its geographic location, which makes it a suitable point of entry to other African countries. Both OEMs and existing local White Goods component manufacturers are a necessity to grow this industry.
5. **Objectives**

The exercise will result in a comprehensive report indicating the viability to create a sustainable enterprise and supplier base in South Africa for the White Goods manufacturing sector.

Assess and conduct a technical audit of identified component manufacturers to determine the state of readiness of the component manufacturers to be incorporated into the global supply chain of OEMs.

6. **Methodology**

The service provider is expected to clearly stipulate the approach and provide a step-by-step explanation of the proposed process to reach the end result of this requirement.

It will be imperative for the service provider to outline in the methodology why a particular method was chosen, what pros, cons and risk factors there are.

The use of appropriate research techniques or approaches based on the need to involve and achieve the highest participation rate possible of individual companies'/industry associations into the process. The service provider will also be required to identify stakeholders to engage in the process.

Proposed methodologies should include, amongst other things:

- Qualitative and quantitative techniques to be used
- Desktop and first hand research approach
- Stakeholder facilitation and engagement model

7. **Scope of Work**

This project will be divided into two phases, which will run over a period of twelve months in total. The phases are broken down as per table below:

- Review of the value chain of the White Goods Industry in SA.  
- Identification of all OEMs and contract manufacturers who are manufacturing White | 5 months |
Goods in the country.

- Conducting a cost-benefit analysis, through factory visits, of the components which are currently being imported by the OEMs but can be made locally.
- Database of component manufacturers operating in the Republic with focus on fridges and stoves.
- Identification of regulatory bodies and regulations applicable to the white goods manufacturing industry.
- Industry tariff analysis and review.
- Analysis of other industry case studies on supplier development. E.g. Autos

The expected outcome of this phase is for the service provider to work together with the OEMs to get the identified component manufacturers assessed and conduct a technical audit to determine the state of readiness for the component manufacturers. It is possible that some of the
deliverables of this phase could be implemented parallel to some of those in the first phase.

**TOTAL BID PRICE (VAT EXCL.)**

Notes: Disbursements (incidental expenses other than professional fees e.g. travel and accommodation, printing costs, venue hire, and equipment hire etc.) must be clearly defined, outlining all assumptions. It is of utmost importance to submit clear and comprehensive cost proposals to allow the IDC to fairly compare bid price / cost proposals. If there is no additional fee envisaged for Disbursements, then the bidder must clearly indicate “No Charge / Free of Charge”. Failure to clearly indicate this, would result in IDC penalising your bid response by taking the cost of the highest bidder and adding 50% thereto and apply this rate for purposes of price comparisons. Bidders are therefore requested to respond clearly and comprehensively on this aspect of their bid response.

The bidder must provide a detailed breakdown of the Disbursements as follows:

Annexure 5: Certificate of Independent Bid Determination

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids\(^1\) invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).\(^2\) Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

---

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals.

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

Annexure 8: BEE Commitment Plan

The IDC encourages existing vendors and prospective bidders to support the objectives of B-BBEE and as far as possible strive to improve their B-BBEE contribution status. For bid evaluation purposes, bidders are allocated points in terms of a preference point system based on the B-BBEE Contribution Level status that is in accordance with a valid B-BBEE certificate.

Bidders are therefore required to submit a B-BBEE improvement plan in view of the new B-BBEE Codes of Good Practice. Bidders must indicate the extent to which their ownership, management control, employment equity, preferential procurement and enterprise development will be maintained or improved over the contract period in the event that they are successful in this bid process.
Annexure 9: Disclosure Statement

Disclosure Statement

In terms of the tender condition 8.6, which allows the IDC to conduct background checks on bidders and its shareholders and directors, the IDC hereby requires bidders to provide the following additional information:

9.1 The IDC considers the integrity of its appointed service providers to be of critical importance. The IDC reserves the right to disqualify from further consideration, any bidder whose integrity, based on past conduct (during the 5 years immediately preceding the bid submission date), it considers questionable.

9.2 To this end, the IDC requires each bidder to include in its bid, a disclosure statement which details the following (with sufficient information and supporting documentation for the IDC to make its own assessment as to the materiality or seriousness of allegations regarding the bidder’s integrity or conduct):

9.2.1 any criminal charges made against the bidder or any of its directors, shareholders or management officials regarding their professional conduct;

9.2.2 any civil proceedings initiated against the bidder or any of its directors, shareholders or management officials regarding their professional conduct; and

9.2.3 any other enquiry or similar proceedings initiated or threatened against the bidder or any of its directors, shareholders or management officials regarding their professional conduct.

9.3 Where the bidder is a consortium, the disclosure statement referred to in paragraph 9.2 above must be made separately in respect of each consortium partner.

9.4 In the event that the bidder’s circumstances change, after submission of its bid, in regard to any matter referred to in paragraph 9.2 above or in regard to any matter referred to in its disclosure statement, the bidder must submit a written notification to IDC indicating the nature and extent of such changed circumstances.

9.5 The IDC reserves the right to seek such additional information from any bidder, in respect of the disclosure statement referred to in paragraph 9.2 above, as it may, in its sole discretion, determine, whether such information has been requested under this RFP or otherwise, and may require the bidder to make oral presentations for clarification purposes or to present supplementary information, in respect of the disclosure statement if so required by the IDC.

9.6 Based on its own assessment of the contents of the bidder’s disclosure statement and any publicly available information which is relevant to the contents of such disclosure statement, the IDC will decide whether the bidder’s conduct or any allegations relating thereto pose a risk, reputational or otherwise, to the IDC; and if it reaches an adverse conclusion the IDC will in its sole discretion have the right to disqualify a bidder from further participation in the tender process. Disqualification on this ground may be done at any stage in the bid evaluation process prior to contract award.
Annexure 10: Local Content Declaration (If Relevant)

This Standard Bidding Document (SBD) must form part of all bids invited. It contains general information and serves as a declaration form for local content (local production and local content are used interchangeably).

Before completing this declaration, bidders must study the General Conditions, Definitions, Directives applicable in respect of Local Content as prescribed in the Preferential Procurement Regulations, 2017, the South African Bureau of Standards (SABS) approved technical specification number SATS 1286:2011 (Edition 1) and the Guidance on the Calculation of Local Content together with the Local Content Declaration Templates [Annex C (Local Content Declaration: Summary Schedule), D (Imported Content Declaration: Supporting Schedule to Annex C) and E (Local Content Declaration: Supporting Schedule to Annex C)].

2. General Conditions

2.1. Preferential Procurement Regulations, 2017 (Regulation 8) make provision for the promotion of local production and content.

2.2. Regulation 8(2) prescribes that in the case of designated sectors, organs of state must advertise such tenders with the specific bidding condition that only locally produced or manufactured goods, with a stipulated minimum threshold for local production and content will be considered.

2.3. Where necessary, for tenders referred to in paragraph 1.2 above, a two stage bidding process may be followed, where the first stage involves a minimum threshold for local production and content and the second stage price and B-BBEE.

2.4. A person awarded a contract in relation to a designated sector, may not sub-contract in such a manner that the local production and content of the overall value of the contract is reduced to below the stipulated minimum threshold.

2.5. The local content (LC) expressed as a percentage of the bid price must be calculated in accordance with the SABS approved technical specification number SATS 1286: 2011 as follows:

\[
LC = \left[1 - \frac{x}{y}\right] \times 100
\]

Where

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>x</td>
<td>is the imported content in Rand</td>
</tr>
<tr>
<td>y</td>
<td>is the bid price in Rand excluding value added tax (VAT)</td>
</tr>
</tbody>
</table>
Prices referred to in the determination of \( x \) must be converted to Rand (ZAR) by using the exchange rate published by South African Reserve Bank (SARB) on the date of advertisement of the bid as indicated in paragraph 3.1 below.

2.6. A bid may be disqualified if this Declaration Certificate and the Annex C (Local Content Declaration: Summary Schedule) are not submitted as part of the bid documentation;

3. The stipulated minimum threshold(s) for local production and content (refer to Annex A of SATS 1286:2011) for this bid is/are as follows:

<table>
<thead>

<th>Stipulated minimum threshold</th>
</tr>
</thead>

</tr>
<tr>

</tr>
<tr>

</tr>
</tbody>
</table>

3. Does any portion of the goods or services offered have any imported content?  
(Tick applicable box)

<table>
<thead>
<tr>
<th>YES</th>
<th>NO</th>
</tr>
</thead>
</table>

3.1 If yes, the rate(s) of exchange to be used in this bid to calculate the local content as prescribed in paragraph 1.5 of the general conditions must be the rate(s) published by SARB for the specific currency on the date of advertisement of the bid.

The relevant rates of exchange information is accessible on www.resbank.co.za

Indicate the rate(s) of exchange against the appropriate currency in the table below (refer to Annex A of SATS 1286:2011):
NB: Bidders must submit proof of the SARB rate(s) of exchange used.

4. Where, after the award of a bid, challenges are experienced in meeting the stipulated minimum threshold for local content the dti must be informed accordingly in order for the dti to verify and in consultation with the AO/AA provide directives in this regard.
