2. BACKGROUND INFORMATION

Established in 1940, the Industrial Development Corporation of South Africa Limited (“IDC”) is a national development finance institution established to promote economic growth and industrial development. The IDC prepares its Annual Financial Statements in accordance with applicable financial reporting standards and regulatory requirements, including IFRS® Accounting Standards, the Public Finance Management Act, JSE Debt Listings Requirements, and the Industrial Development Corporation Act.

The Finance function is responsible for ensuring that financial reporting outputs are accurate, complete, reliable, audit-ready, and supported by sound governance, robust reconciliations, appropriate substantiation, effective internal controls and efficient ways of working. Strengthening financial discipline, audit readiness, controls and Finance performance require a structured and sustainable approach to balance sheet substantiation, preventative financial controls and business transformation, including process optimisation, automation, data integration, capability building and enhanced Finance business partnering.

It is against this background that the IDC seeks to appoint qualified professional service provider/s to advise on the design and implementation of a Balance Sheet Substantiation Framework, the Enhancement of preventative financial controls, and the execution of a Business Transformation.

3. SCOPE OF WORK/TERMS OF REFERENCE

3.1. The successful qualified professional service provider(s) appointed will be required to support the Finance function in strengthening financial governance, improving audit readiness, reducing financial reporting risk and enabling sustainable business transformation within the Finance function. The scope covers the design and implementation of a standardised, risk-based Balance Sheet Substantiation Framework; the enhancement of preventative financial controls; and business transformation support aimed at improving the efficiency, effectiveness and sustainability of key finance processes through process optimisation, automation, data integration, improved ways of working, capability building and enhanced Finance business partnering.

The appointed service provider(s) will also be expected to support management in translating internal and external audit findings, including overdue and recurring findings, into practical remediation plans with clear root causes, accountable owners, target dates, evidence requirements, closure criteria and progress reporting mechanisms.

The services are grouped into three (3) service categories, as outlined below. Bidders must indicate the service category or categories for which they are submitting a proposal.

Category	Description	Required services and deliverables	PLEASE TICK (✓)
Service Category 1	Design and implementation of a standardised, risk-based Balance Sheet Substantiation Framework.	In relation to this category, the appointed service providers will be expected to assist IDC in developing a practical and sustainable framework that clarifies account ownership, standardises substantiation requirements, strengthens review and approval disciplines, and improves the quality of supporting evidence for financial reporting purposes	.
Service Category 2	Enhancement of the preventative financial control environment.	The appointed service provider will be expected to assess and design enhancements to preventative financial controls to reduce reliance on detective controls and manual after-the-fact corrections and provide implementation support for approved control improvements, including pilot testing, refinement, training, and handover. These enhancements are expected on both IT-dependent and automated controls, as well as manual preventative controls across key finance processes	
Service category 3	Business transformation	This is expected to support a faster, more predictable and better-controlled month-end and financial statement close processes, reduce processing errors and manual rework, strengthen the overall control environment, and contribute to lower operating costs through process optimisation, reduced manual effort and more effective use of Finance resources.	
Bidders may bid for one or more of the three service categories. Where a bidder bids for more than one category, it must separately demonstrate compliance with the requirements applicable to each category. IDC <u>may</u> appoint one bidder for all categories, appoint different bidders for each category, or appoint any combination of bidders that, in IDC's sole discretion, best meets its requirements.

- Develop a comprehensive Balance Sheet Substantiation Framework, including policy principles, methodology, governance requirements, account ownership, minimum documentation standards, evidence requirements, frequency of substantiation, and review protocols.
  - ✓ Define risk-based account classification criteria, materiality thresholds, tolerance levels, escalation triggers, and treatment of aged, unsupported, suspense, clearing, and reconciling items.
  - ✓ Develop standard reconciliation and substantiation templates for key balance sheet account categories.
  - ✓ Define preparer, reviewer, approver, finance leadership, and governance oversight responsibilities, including a RACI matrix.
  - ✓ Design reporting and monitoring mechanisms, including dashboards, key performance indicators, exception reporting, ageing analysis, remediation tracking, and management certification.
  - ✓ Link the Balance Sheet Substantiation Framework to audit finding remediation by identifying aged, unsupported, suspense, clearing and reconciling items that have resulted in recurring internal or external audit findings, and defining clear remediation actions, ownership, timelines and closure evidence.
  - ✓ Identify implementation considerations, dependencies, risks, and practical rollout requirements for IDC management approval.
  - ✓ This engagement will also include but not limited to the implementation support, provided on an ad hoc basis, to ensure that approved framework is embedded in a practical, sustainable and operationally effective manner. This support may include the development of practical tools, templates, operating procedures, governance mechanisms, training, knowledge transfer, pilot support and handover activities.

- Recommend improvements to reduce control duplication, eliminate ineffective controls, strengthen accountability, and improve consistency across finance teams.
- Identify process optimisation opportunities within manual preventative controls, including simplification of handoffs, reduction of rework, standardisation of approval routines, removal of duplicate control activities, and alignment of controls to efficient finance workflows.

- Design standardised, simplified and repeatable finance processes supported by clear ownership, defined service levels, appropriate controls, escalation protocols and consistent documentation standards.
- Identify and prioritise automation opportunities for repetitive, rules-based and high-volume finance activities, including workflow approvals, reconciliations, reporting, data extraction, validation checks, exception reporting and close monitoring.
- Assess practical opportunities to embed automation, analytics and responsible use of AI to improve process efficiency, reduce processing errors, enhance early-warning indicators, support exception management and strengthen decision-making.
